AVAILABLE FROM G1MRA BOOK SALES

NEW FOR THE BEGINNER IN 2011 - ARMIG

A scale live steam working model in Gauge 1 that involves very little engineering and is simple to run. Up to now our approach has been from the angle of the model engineer and, although this has been included, the primary aim of ARMIG is to encourage the starter with limited facilities and time.

Other books available are:-

Project Book

Written by Bob Hines & Ron Poulter. Illustrated by over 40 photographs. 84 pages including full drawings and constructional descriptions to build a live steam single cylinder LMS 4F 0-6-0 tender engine. Also a selection of variants built to the basic design.

Dee Book – Edition 3

Written by Dick Moger & Barry Applegate. The sequel to the Project book. 96 pages including full drawings and constructional descriptions to build a live steam SR D class twin inside cylinder tender engine. This edition includes reprints of articles by Dick Moger, describing a revised safety valve design, and by John Werren, describing the Swiss DEE Team's construction of three DEEs.

Dee Metric Drawings

Converts for metric stock, material & tools. These are complementary to the Dee book, they are not an alternative.

Modelling in Gauge 1 - Book 1 - Electric Propulsion

Our first book in this series draws on articles from 200 Association Newsletters to bring you the collective experience and wisdom of G1MRA members on the subject of Electric Propulsion. Motors, gears, locos, bogies, controllers, batteries, tracks and much more. Compiled by Bob Hines using the index created by Geoff Hammond.

Modelling in Gauge 1 - Book 2 - John van Riemsdijk's Contribution to Gauge One - Edition 2

This book draws on the many articles and letters written by the late JvR which have been published in more than 200 Association Newsletters over a 50 year period. John's work was legendary. This Edition 2 contains his words, photographs and drawings plus four extra articles written after publication of Edition 1. JvR's obituary, written by Graham Colover in the Autumn of 2008, is also included.

Modelling in Gauge 1 - Book 3 - Freight Stock

Prepared by Peter Howland.

A compilation of articles on Freight Stock that have appeared in the G1MRA Newsletter since 1963.

Modelling in Gauge 1 - Book 4 - Coaching Stock

Prepared by Peter Howland.

A compilation of articles on Coaching Stock that have appeared in the G1MRA Newsletter since 1963.

A Pictorial History of G1MRA

A 96 page celebration of G1MRA's Diamond Jubilee prepared by Michael Wrottesley. An amazing selection of photographs from G1MRA archives, showing garden get-togethers and exhibitions between 1947 and 2007.
